Graded Basic Capabilities of the SQL Quality Management Platform
Certificate of Verification

Qingdao Jukan Cloud Technology Co., Ltd.

Company Address: No. 399 Songling Road, Laoshan District, Qingdao City, Shandong Province, Hisense Research and Development Center

Product / Service Name: DBdoctor Database Intelligent Monitoring, SQL Audit and Governance, Data Security and Operation & Maintenance Autonomous Platform

Product Version: V3.0

Compliant with Standard: FT-Y03-0387-01 'Requirements for Capability Grading of Big Data Structured Query Language (SQL) Quality Management Platforms'

In accordance with FT-Y03-0387-01 'Requirements for Capability Grading of Big Data Structured Query Language (SQL) Quality Management Platforms',

Following examination, your organization's DBdoctor database intelligent monitoring, SQL auditing and governance, data security, and autonomous operation and maintenance platform V3.0 satisfies the testing criteria in the SQL Collection Capability Domain, SQL Auditing Capability Domain, SQL Query Capability Domain, SQL Optimization Capability Domain, Integration Compatibility Capability Domain, and Platform Fundamental Capability Domain, achieving Level 3 (Advanced Level). For detailed information, please refer to the Inspection Report (Report No.: 25V01Y001954-001). This certificate is hereby issued.

[As this test disclosure reflects the product status prior to December 2025, users should remain attentive to potential risks that may arise during actual use.] Due to the rapid development of Structured Query Language (SQL) quality management platform technology, continuous product/service upgrades and iterations, and the ongoing revision of standards in line with industry progress, it is recommended that Qingdao Jukan Cloud Technology Co., Ltd. perform retesting when significant changes occur in either the product or testing standards.

China Academy of Information and Communications Technology will organize a new round of testing in December 2026.
